
Everything runs on the user's machine; outbound calls are opt-in.
Inputs
Resume: PDF, DOCX, LaTeX, Typst
+ optional JD
Layout-aware ingestion
PyMuPDF spans + fonts
v2 reading order
sections > entries > statements (line ids)
JD requirement parser
Deterministic scoring
ATS rubric: 9 rules, 100 pts
RRI: 7 dimensions, 100 pts
bullet grades A-D
VIQ, simulated 7.4 s skim
naive-parser views
Integrity checks
hidden-text scan (render mode, opacity, size, contrast)
timeline consistency
GitHub claim check (opt-in)
Semantic matching
fine-tuned bge-small-resumex
7-dimension hybrid fit score
alias + taxonomy matching
requirement-level evidence
Hybrid RAG
26 chunks: role norms, skills, guidance, project archetypes
0.65 dense + 0.35 BM25
cited chunk ids
Tiered local LLM (Ollama)
fast: Qwen3-4B, editor co-pilot
deep: Qwen2.5-7B, background
temperature 0, JSON schema
labels only, never scores
Grounding guards
fact-checker: numbers + entities
alias / hypernym taxonomy
verbatim-quote check (STAR)
rejected outputs are shown
Outputs
• Line-anchored findings
• Mock interview (3 rounds)
• In-place PDF editor
• Exports: own-layout PDF, DOCX, .tex
• Apply-all suggestions
• Optional account history
